What else NEED?

Qubo App on your Smartphone

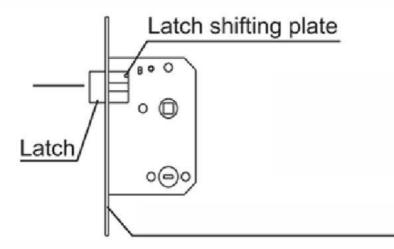

4 AA Alkaline Batteries are recommended

Installation Preparation

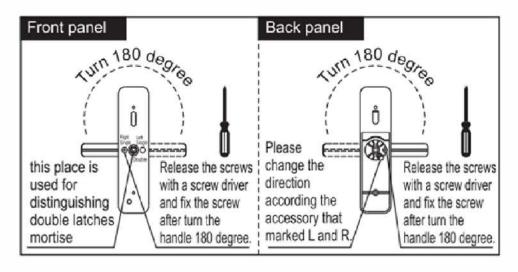

Change latch direction- by default it is on right in-right out

- 1. Pull the Latch shifting plate to another side
- 2. Push the latch into the mortise and turn 180 degree

Change handle direction (Left and Right)

By default, Door lock is for Right - Out, Right-In doors. To change handle direction of front panel to left in-left out read instructions below:

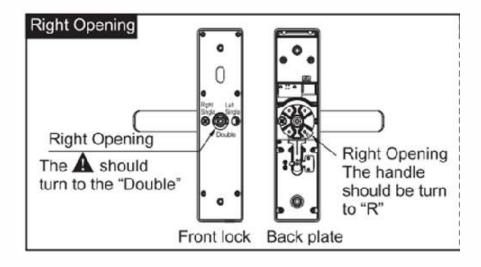

Step 1: Take out the Screw from front panel

Step 2: Rotate the handle to other direction

Step 3: Fasten the screw

CHANGE HANDLE DIRECTION OF BACK PANEL

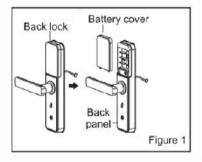

Step 1: Take out the Screws

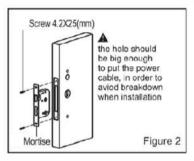

Step 2:Rotate the handle to the other end

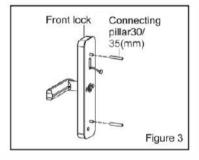

Step 3: Fasten the screws

Installation

Step 1: Position the 'drilling template' (provided in box) on the door and drill holes as indicated

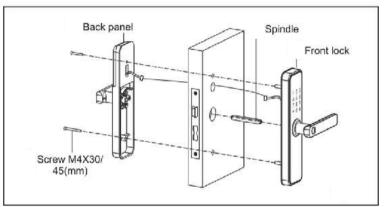

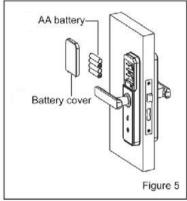

Step 2: Install the Mortise as mentioned in the picture and tighten the screws to fix the mortise on the door.

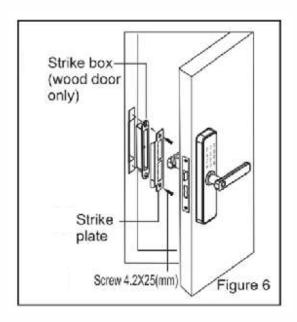

Installation

Step 3: Fix screw bolt on the front panel, Place Square shaft and pressure spring into the bore.

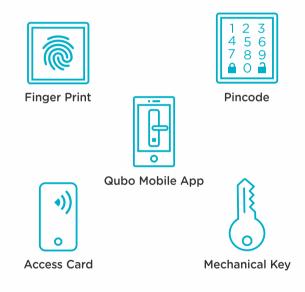

- Step 4: Pass the connection cable through the bore. Then align and insert square shaft into mortise holes to make the front panel fit against the door closely.
- Step 5: Insert the connecting cable through the mortise and front panel into related socket.
- Step 6: Fasten the back panel to the door using Mounting screws.

Step 4: Install the batteries and the battery cover. Then install the strike plate on the door frame to finish the installation. Please check handle and mechanical key if they are working properly.
