HOW TO INSTALL YOUR SMART DOOR LOCK

Check for the direction in which the door opens.

Irrespective of the direction they open in, Qubo Smart Door Locks are compatible with all doors.

Right-out

Right-in

Left-out

Left-in

SET HANDLE DIRECTION OF FRONT PANEL

The handle is initially free-moving. To adjust its position, select the desired direction and then secure it in place by tightening the screw on the back.

Step 1:

Turn the handle to the desired position.

Step 2:

Tighten the screw to ensure the handle is securely fixed.

Step 3:

A: Right-in or Right-out door, The square axle hole is in the vertical direction.

B: Left-in or Left-out door, The square axle hole is in the horizontal direction.

SET HANDLE DIRECTION OF BACK PANEL

The handle is initially free-moving. To adjust its position, select the desired direction and then secure it in place by tightening the screw on the back.

Step 1:

Turn the handle to the desired position.

Step 2:

Tighten the screw to ensure the handle is securely fixed.

SET LATCH DIRECTION

The latch is set to right-in/right-out motion by default.

Hold up the 'bolt switcher'. Push and rotate the latch inside the mortise and

Note:

- After you change the latch, remove the directional screw and fix it to the other side.
- The directional screw should be facing inside the door.

Step 1: Position the 'drilling template' (provided in the box) on the door and drill holes as illustrated.

Step 2: Install the Mortise as illustrated in the picture and tighten the screws to fix the mortise on the door.

Disclaimer Make sure all four holes are properly aligned as per the drilling template.

Step 3: Put the key cylinder into the corresponding position of the mortise, then fasten it via tightening the screw.

Step 4: Fix 2 connecting screw bolts on the front panel, place square shaft into the bore & fix the same using iron pin.

Disclaimer Ensure the end of the shaft is securely fastened using the pin provided by twisting it into place.

Step 5: Pass the connecting cable through the bore. Then align and insert square shaft into mortise holes to make the front panel fit against the door closely.

Step 6: Place square shaft in the back panel properly.

Disclaimer Post installation, check if the lock is working smoothly by opening and closing the door. Test if the mechanical key is also working smoothly or not.

Step 9: Plug-in the batteries and the battery cover. Lastly, install the strike plate on the door frame.

Note:

By default Master Pincode is assigned USER NUMBER "001" and after that which ever Fingerprint/Pincode/Access card you will add would be assigned USER NUMBER "002" & this will be continued in sequence for further additions.

PASSAGE MODE

What is Passage Mode?

It allows you to temporarily disable the auto-lock feature-perfect for times when you need the door to stay open for constant in-and-out movement. For instance, if you have a main gate that's locked, but you want the main door open during the day for easy access as family members, support staff, or visitors come and go, simply enable Passage Mode to keep things convenient. Then, at night, disable Passage Mode to automatically restore the door's security. It's a smart way to keep your home both open and secure when you need it.

HOW TO ENABLE PASSAGE MODE

Step 1:

Wake up touchscreen keypad with palm.

Step 2:

Press [*] twice, input master PIN code and press [#] to confirm.

Step 3:

Press 6. Passage Mode is Enabled.

Step 1:

Wake up touchscreen keypad with palm.

Step 2:

Press [*] twice, input master PIN code and press [#] to confirm.

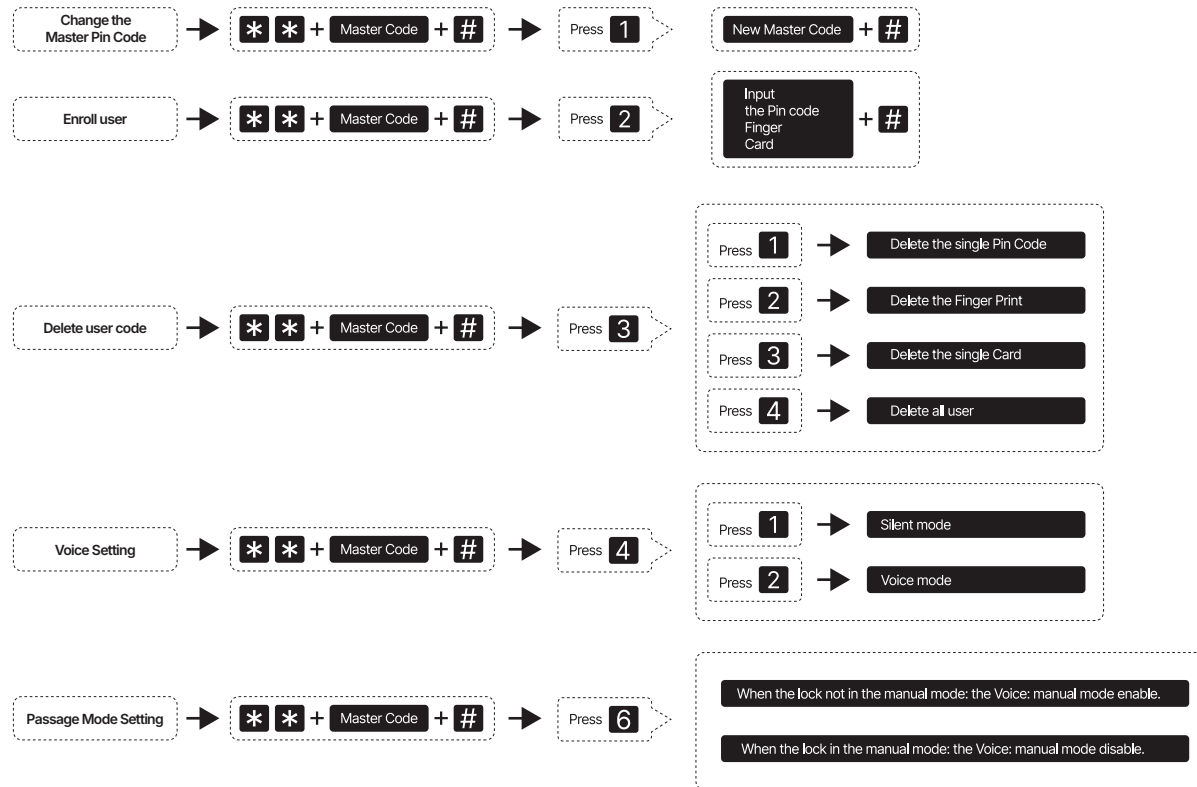

Step 3:

Press 6. Passage Mode is Disabled.

Note:

While lock is in passage mode, if someone uses normal access method to unlock the door(registered fingerprint/pin/access card), Passage mode gets disabled

QUICK SETUP

HOW TO UNLOCK FROM FRONT PANEL

Via Pincode

1. Slide your hand on the touch pad from top to bottom to activate the number keypad.
2. Enter passcode and wait for the voice prompt before opening the door.
3. Press the handle downward to open.

Via Fingerprint

1. Place your registered finger on the fingerprint sensor and wait for the voice prompt before opening the door.
2. Press the handle downward to open.

Via Access Card

1. Place the enrolled access card properly on the access card reader until you hear a beep sound and a voice prompt.
2. Press the handle downward to open.

UNLOCK BY MECHANICAL KEY

Open the panel covering the key hole from the bottom side by pulling it out and then pushing slightly downwards (as shown in image)
Now rotate in any direction to uncover keyhole

Insert the key into keyhole and rotate. Lastly, press down handle to open the door.

Mechanical key can be used as backup in case you forget the passcode, or the lock runs out of battery.

EASY EVERYDAY LOCK/UNLOCK

Outdoor | Front panel

Indoor | Back panel

OTHER FUNCTIONS

Factory Reset- Operation Instructions:

1. Open back cover and find the reset button.
2. Use a paper clip to swiftly double click [RES] button. Reset your passcode after the voice prompt, "Restored to factory settings, change master passcode".
3. All user data and settings will be deleted after Factory Reset.

EMERGENCY POWER SUPPLY

Front panel

1. If the lock battery runs low, use the emergency power supply port to charge and turn on the device. The port is located at the bottom of the front panel.

REPLACE BATTERY

When the battery voltage drops below 20%, the lock alerts the user through a voice prompt, "**Low battery, please replace all batteries**".

Four AA alkaline batteries, each of 1.5V, are required. Replace all the old batteries with the new one. Do not mix the old and new batteries while replacing.

Safety Guidelines

Read and understand all instructions before using the Qubo Smart Door Lock.

- Damage caused by failure to follow instructions is not covered under the warranty.
- Do not install the Smart Lock in an outdoor environment.
- It is recommended to use only the enclosures/ accessories specified by Qubo.
- Use only good quality AA alkaline batteries with the product.
- Do not forcibly disassemble this product in order to avoid alarm sound or physical damage to the product.
- Do not try to dismantle the smart lock or use unnecessary force using sharp tools on the lock. Doing so can cause an electronic shock.
- Do not scratch the fingerprint reader with any sharp objects so as to avoid any permanent damage.
- Do not expose the lock to corrosive substances to avoid damage to outer protective layer of the product.
- When cleaning the product, please wipe it with a soft cloth. Do not use water and any type of solvent to clean the product such as gasoline, alcohol or benzene as they can cause damage to electric circuit, deterioration and/or paint to peel off.
- Do not remove the batteries while operating the lock.
- Please ensure installation is carried out by a professional expert by strictly following company suggested installation instructions.
- After the Door Lock is installed, please modify the default master Passcode immediately and keep the mechanical key in a safe place.

Do not disclose the new passcode to any unknown person.

- When low battery alarm is triggered, please replace all the batteries immediately.

Warning:

- Do not dispose the batteries in fire as it may cause an explosion.
- Do not short-circuit the two poles of the battery lead with metal objects as it may cause an explosion.
- Please make sure replacement or maintenance is carried out by a professional expert authorized by Qubo.
- Your warranty may stand null & void if other than Qubo accessories are used (avoid using accessories from other manufacturers).

Disposal of used battery and lock

- Please understand the local electronic product classification and collection system.
- Please follow the local regulations and do not discard used batteries into ordinary household garbage.
- Proper disposal of used product helps to avoid potential negative impacts on the environment and human health.
